Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a polymer transducer, classified in class 310, subclass 309.
- II. Claims 11-15, drawn to a polymer transducer, classified in class 310, subclass 309.
- III. Claims 16-18, drawn to a polymer transducer, classified in class 310, subclass 309.
- IV. Claims 19-22, drawn to a polymer transducer, classified in class 310, subclass 309.
- V. Claims 23-37, drawn to a laminated polymer transducer, classified in class 310, subclass 309.
- VI. Claims 38-44, drawn to a method of making a polymer transducer, classified in class 29+.

The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I-V and group VI are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as

Art Unit: 2834

claimed can be used to make other and materially different product such as a piezoelectric component as opposed to an electrostatic component.

Independent claims 1, 11, 16, 19 and 23 of Groups I-V, respectively, are generic to a plurality of disclosed patentably distinct species comprising different materials. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed, or elect the method of making which is Group VI.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
